

APPENDIX

BULDING HEIGHT – PITCHED ROOFS

The following is an example of the building height for a building with multiple pitched roofs. As per the definition of Building Height contained in Section XIV: **BUILDING HEIGHT:** The vertical distance from the average top of foundation in the front elevation to the highest point of the coping of a flat roof or to the deck line of a mansard roof, or to the mean height level between eaves and ridge for gable, hip or gambrel roofs.
